

Xarxes Catalunya Grup SL

Tender: CTTI-2026-1

Servei de suport a la migració al nou model de connectivitat de la Generalitat de Catalunya

Envelope: Sobre B — Technical Proposal (Judici de Valor)

Language: English (Prototype)

Status: Synthetic — for evaluation agent testing

Xarxes Catalunya Grup SL presents this proposal for CTTI tender CTTI-2026-1. We are an established provider of connectivity infrastructure services with broad experience across the Catalan public sector. Our proposal demonstrates capability across all service areas of the tender.

SERVEI DE SUPORT A LA MIGRACIO

Reporting Methodology and Dashboards

Our reporting model provides comprehensive visibility of the transformation programme through tailored dashboards aligned with CTTI's observability requirements. Dashboards are updated with appropriate frequency and provide granular and aggregated views of programme status. Our reporting team ensures timely delivery of all agreed reports in the formats required by CTTI.

Pla Mestre per la Transformació

Xarxes Catalunya proposes a master transformation plan that prioritises service points based on technical readiness and strategic importance. Our methodology ensures that migration rates align with the programme objectives and that dependencies between workstreams are appropriately managed. The plan will be developed in full detail during the constitution phase following the completed workload inventory.

Team Qualifications

Our service management team comprises experienced professionals with relevant backgrounds in connectivity and ICT project management. Team members hold appropriate certifications and have worked on projects of comparable complexity in the public and private sectors. Detailed CVs are provided in Annex B of this submission.

SERVEI DE REDACCIO I DIRECCIO FACULTATIVA

Project Drafting Capacity

Our drafting team is capable of managing the simultaneous redaction of municipal construction projects as required under the tender. Team members have experience in fibre network construction project design and are familiar with applicable CTTI technical specifications. Capacity will be confirmed and dimensioned during the constitution phase.

Facultative Direction Capacity

Xarxes Catalunya deploys qualified Directors d'Obra for the facultative direction of fibre deployment works. Our directors have experience in civil infrastructure projects and are familiar with the requirements of fibre network deployment. The team will be dimensioned to meet the simultaneous direction requirements specified in the PPT.

SERVEI DE QUALITAT, EVOLUCIO I MILLORES

Risk Analysis

Xarxes Catalunya has identified the following key risks for this programme:

- Dependency delays from third-party infrastructure owners — mitigation: proactive engagement and escalation procedures
- Resource availability constraints during peak periods — mitigation: flexible resource pool and subcontracting arrangements
- Technical complexity of legacy service migration — mitigation: detailed technical assessment during constitution phase

Quality Control Proposal

Our quality control approach covers all phases of the migration programme and ensures that services are delivered to the required standard. Quality procedures will be defined in detail during the constitution phase and will incorporate CTTI's existing quality frameworks and tools.

SERVEI DE L'ESTRATEGIA DE LA TRANSFORMACIO

Our transformation strategy team provides expert support to CTTI in defining and evolving the connectivity transformation strategy. Team members have broad experience in network technology and can provide advisory support across the technological domains relevant to this contract. Strategy deliverables will be defined and agreed with CTTI during the constitution phase.

ADVISORY: This document is a synthetic technical proposal generated for evaluation agent testing purposes only. All company names, personnel, certifications, and project references are fictional.
